DRAFT

Introduction

The Graduate School is pleased to present a **draft version** the *Annual Statistical Report* for the 2006-2007 Academic Year. This document provides detailed reporting on many aspects of graduate education and financial support for the academic year that includes Summer 2006, Fall 2006, and Spring 2007 semesters. Data are provided on applications, enrollments and degree productivity by college and individual program, as well as on assistantship and fellowship support.

This report contains individual profile pages for each of the University's graduate programs. These profile pages offer a concise account of the academic activity and support associated with each graduate program, including a detailed report of all Graduate School funding obtained by the program.

I hope you find the information contained herein to be useful in program review and planning activities. If you have questions or need additional data, I encourage you to contact Dr. Onecia Gibson, the Graduate School Data Research Analyst.

Dr. Jeannine Blackwell, Dean
The Graduate School

April 2008

Notes

Academic data reported in the *Annual Statistical Report* (applications, enrollments, degrees) are for Academic Year 2006-2007 which encompasses the 2006 Four-Week Intersession, the 2006 Eight-Week summer session, Fall 2006 semester and Spring 2007 semester. Students enrolled in more than one graduate program during the 2006-2006 academic year are reported in the most advanced (concurrent students) or last program.

Race/Ethnicity Reporting: Race/Ethnicity data are collected for domestic applicants (U.S. citizen or permanent resident) on a voluntary basis. Available designations are Hispanic (H), Black/Non-Hispanic (B), Asian/Pacific Islander (O), White/Non-Hispanic (W), American Indian (I). Minority applicants are the sum of populations H, B, O, and I. The designation Black in this report corresponds to the Black/Non-Hispanic category available on the UK application and includes African Americans.

Selectivity & Yield: The parameters Selectivity and Yield reflect the proportion of applicants that are admitted to the Graduate

School and the proportion of admitted applicants that enroll, respectively. Selectivity (**S**) = proportion of applicants with a *complete* application who are admitted to the Graduate School. Yield (**Y**) = proportion of admitted applicants who subsequently enroll at the University. Selectivity and Yield are calculated for degree programs (Doctoral, Specialist, Master's), only.

Assistantships and Fellowships: The number of assistantships (Teaching Assistants, Research Assistants, Graduate Assistants and Fellows/Trainees) was determined for each program using 2006-2007 payroll data; only enrolled graduate students in these designations were counted. The figures reported are headcounts, and do not reflect fraction of effort. The headcounts reported for Fellows include all full Fellowships and Traineeships, as well as other partial or supplementary fellowship awards. The stipend totals reported for TAs, RAs, GAs, and Fellows/Trainees are for the entire 2006-2007 fiscal year; only support for enrolled graduate students was counted. The figures for tuition scholarships reflect all University tuition scholarships paid through certain fellowships and other assistantships.

Highlights

- A total of 1,657 graduate degrees were awarded: 286 doctoral degrees, 34 specialist and 1,337 master's degrees.
- Degrees awarded to Kentucky Residents: 65 doctoral degrees and 469 Master's degrees and 17 Specialist degrees.
- Overall enrollment for the academic year was 6,987.
- Master's & Specialist enrollments (3,637) were both at an all-time high.
- Minority student enrollment for the academic year was 514.
- The Graduate School received 7,494 completed applications in this academic year.
- Total graduate student support for the academic year exceeded 24 million dollars.
